-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 December 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

Claim Objections

Claims 5-12 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only, and/or, cannot depend from any other multiple dependent claim. A multiple dependent claim may not serve as a basis for any other multiple dependent claim, either directly or indirectly See MPEP § 608.01(n). Accordingly, the claims 5-12 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 4,752,981 to Salens.

Claim 1, Salens discloses a device for attaching at least one slat of a slatted base to a frame of the slatted base, the device comprising a first member (7) arranged to be attached to the inner side of the frame of the slatted base and comprising first connecting means (6), a second member (1) comprising a top portion (2) arranged to engage an extremity of at least one slat of the slatted base, a base portion (4) connected to the top portion by means of at least one resilient member (3), and second connecting means (5) arranged to cooperate with the first connecting means so as to allow connecting the first member to the second member in a plurality of relative positions with respect to each other in view of adjusting the position of the at least one slat with respect to the frame of the slatted base, characterized in that the resilient member and second

connecting means are disposed with respect to each other on the second member in such a way that when compressing the resilient member, the top portion of the second member is displaceable with respect to the frame in the height adjustment direction of the least one slat, to the level of the second connecting means.

Claim 2, characterized in that the said resilient member is disposed laterally with respect to the second connecting means.

Claim 4, characterized in that said base portion of said second member is rigid and in that said top portion of said second member is flexible.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 4,752,981 to Salens in view of U.S. Pat. No. 5,924,149 to Weber.

Claim 3, Salens discloses all of the Applicant's claimed limitations except for the second member comprising a first and a second resilient member, disposed on opposite sides of said second connecting means. Weber discloses a device having a second member comprising a first and a second resilient member (1,2',6')(1,2,6), disposed on opposite sides of said second connecting means (fig. 1a). It would have been obvious to one having ordinary skill in the art at the time of the invention to employ first and second resilient members as taught by Weber in order to provide optimal adjustment and positive support.
